HOW TO INSTALL

1. copy unzipped «X-Life» folder to ../X-PLANE/Resources/plugins/ folder

2. start X-Plane 11.35 64 bit and load any aircraft

3. Use X-Plane menu and select the Plugins->X-Life->Deluxe->Registration menu and enter your email and the serial key. Next press the SEND button - You should get activation code, what must be entered in the 'code' field and press CONFIRM. If product registred well - you need exit X-Plane and load X-Plane again. You will get Deluxe version after this. If necessary to reinstall, please use the same e-mail and serial number.

* - If code not appear, please check your mail - you should get code by mail and paste code to Code box.

4. Be sure what you have at least one of static library installed - OpenSceneryX. If not, you can install it for free opensceneryx.com If you prefer use "Bluebell XL" traffic AI library, please download 3 files from
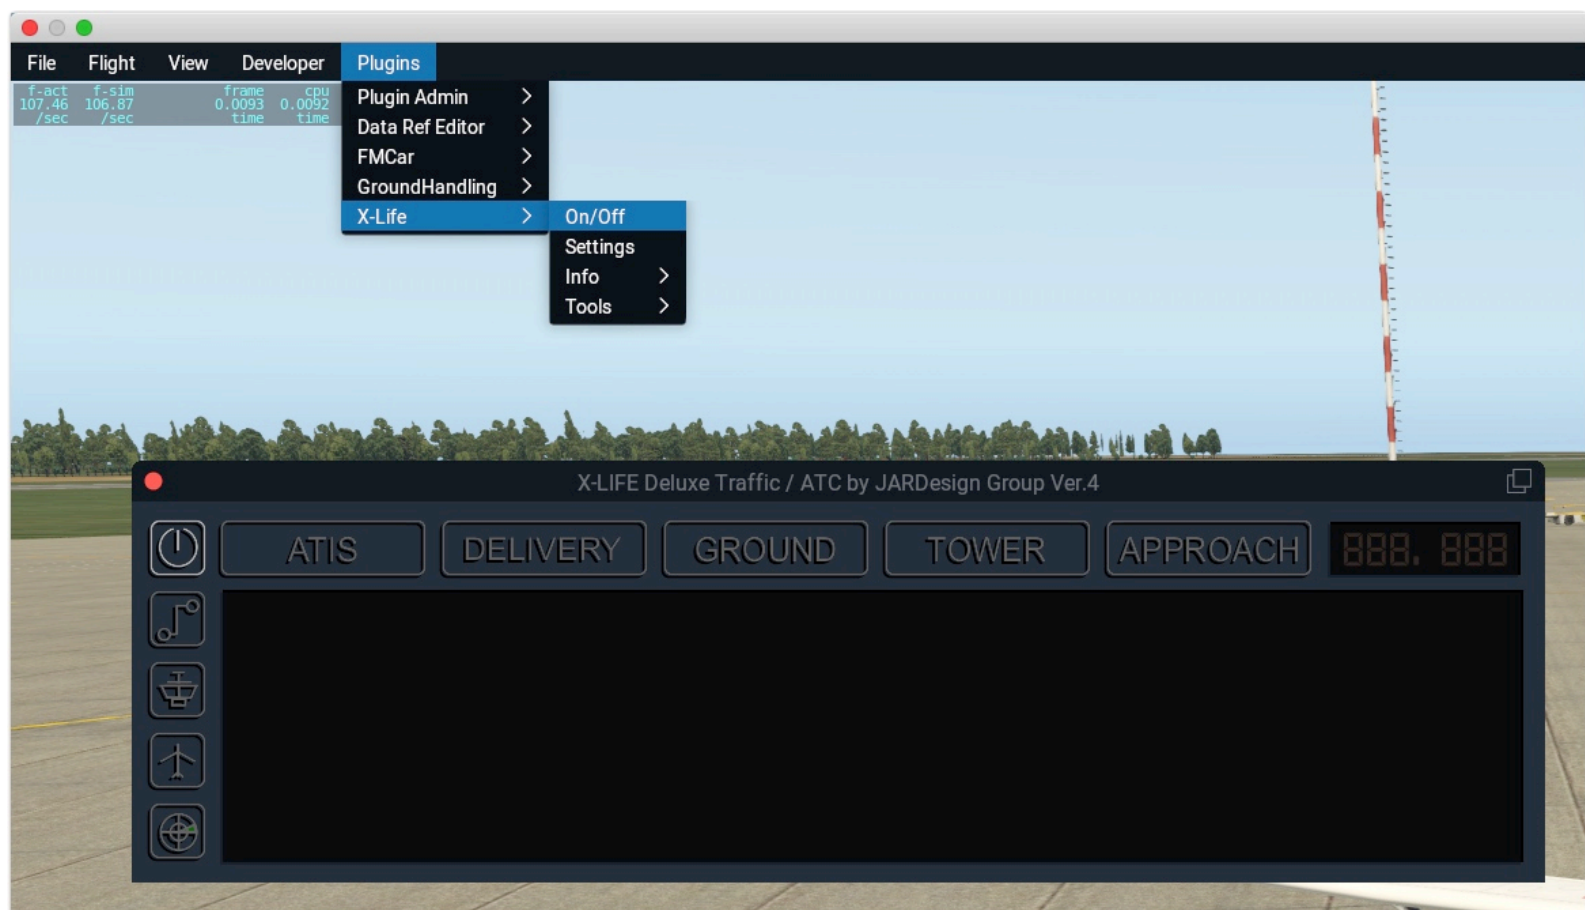

http://jardesign.org/downloads/BBXL/BBXL-1.zip

http://jardesign.org/downloads/BBXL/BBXL-2.zip

http://jardesign.org/downloads/BBXL/BBXL-3.zip

Next unZIP and put "Bluebell XL" folder to ../X-PLANE 10/Custom Data/ folder and install folders "PackA", "PackB", "PackG", "PackJ", "PackP" to ../X-PLANE 10/Custom Data/Bluebell XL/ folder

HOW TO USE

Use Menu->Plugins->X-Life->On/Off to open ATC panel

Click Start button (left upper corner) to start traffic.

Wait until left-side buttons will become active.

Click ROUTE button and enter Departure airport ICAO Code, Arrival airport ICAO Code, your Cruize FL and click GENERATE FLIGHTPLAN

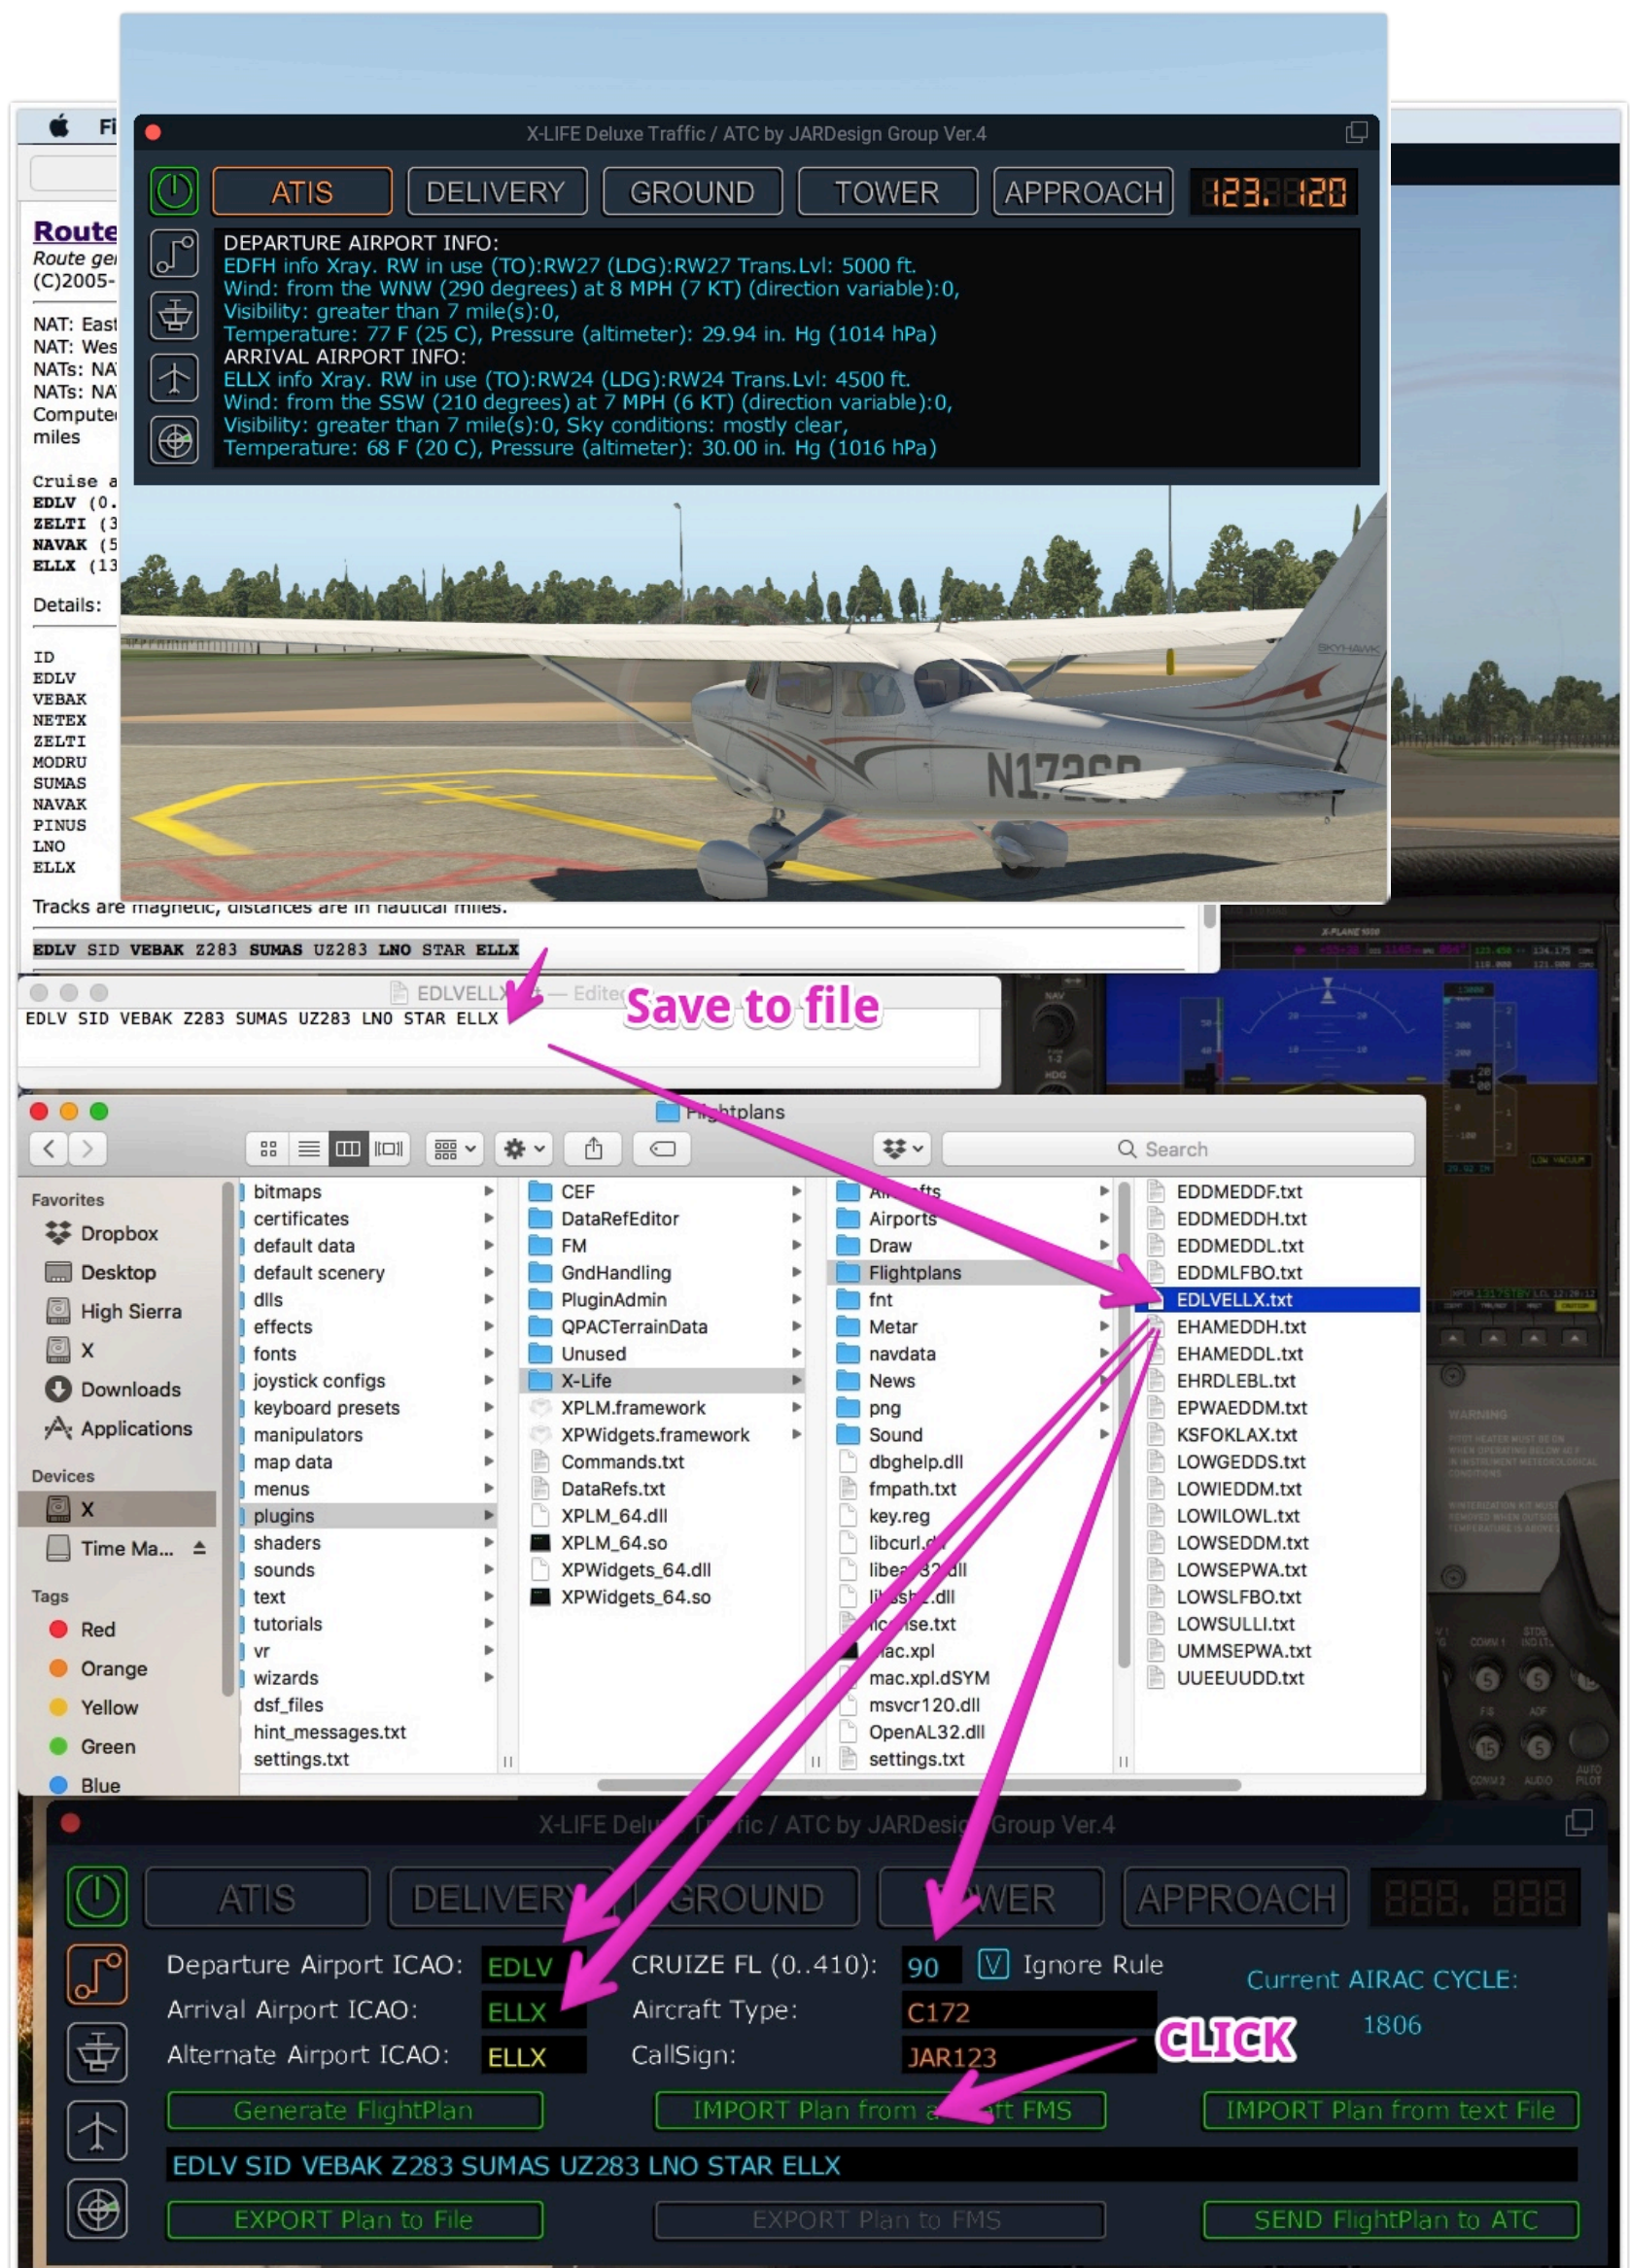

Next you should Send Result flightplan to ATC (click button) and (optional) Export plan to aircraft FMS (may not supported for your aircraft). Below screen show how export work with default X1000 FMS.

Position buttons like ATIS, DELIVERY, .. will be active. Lets read ATIS (click it)

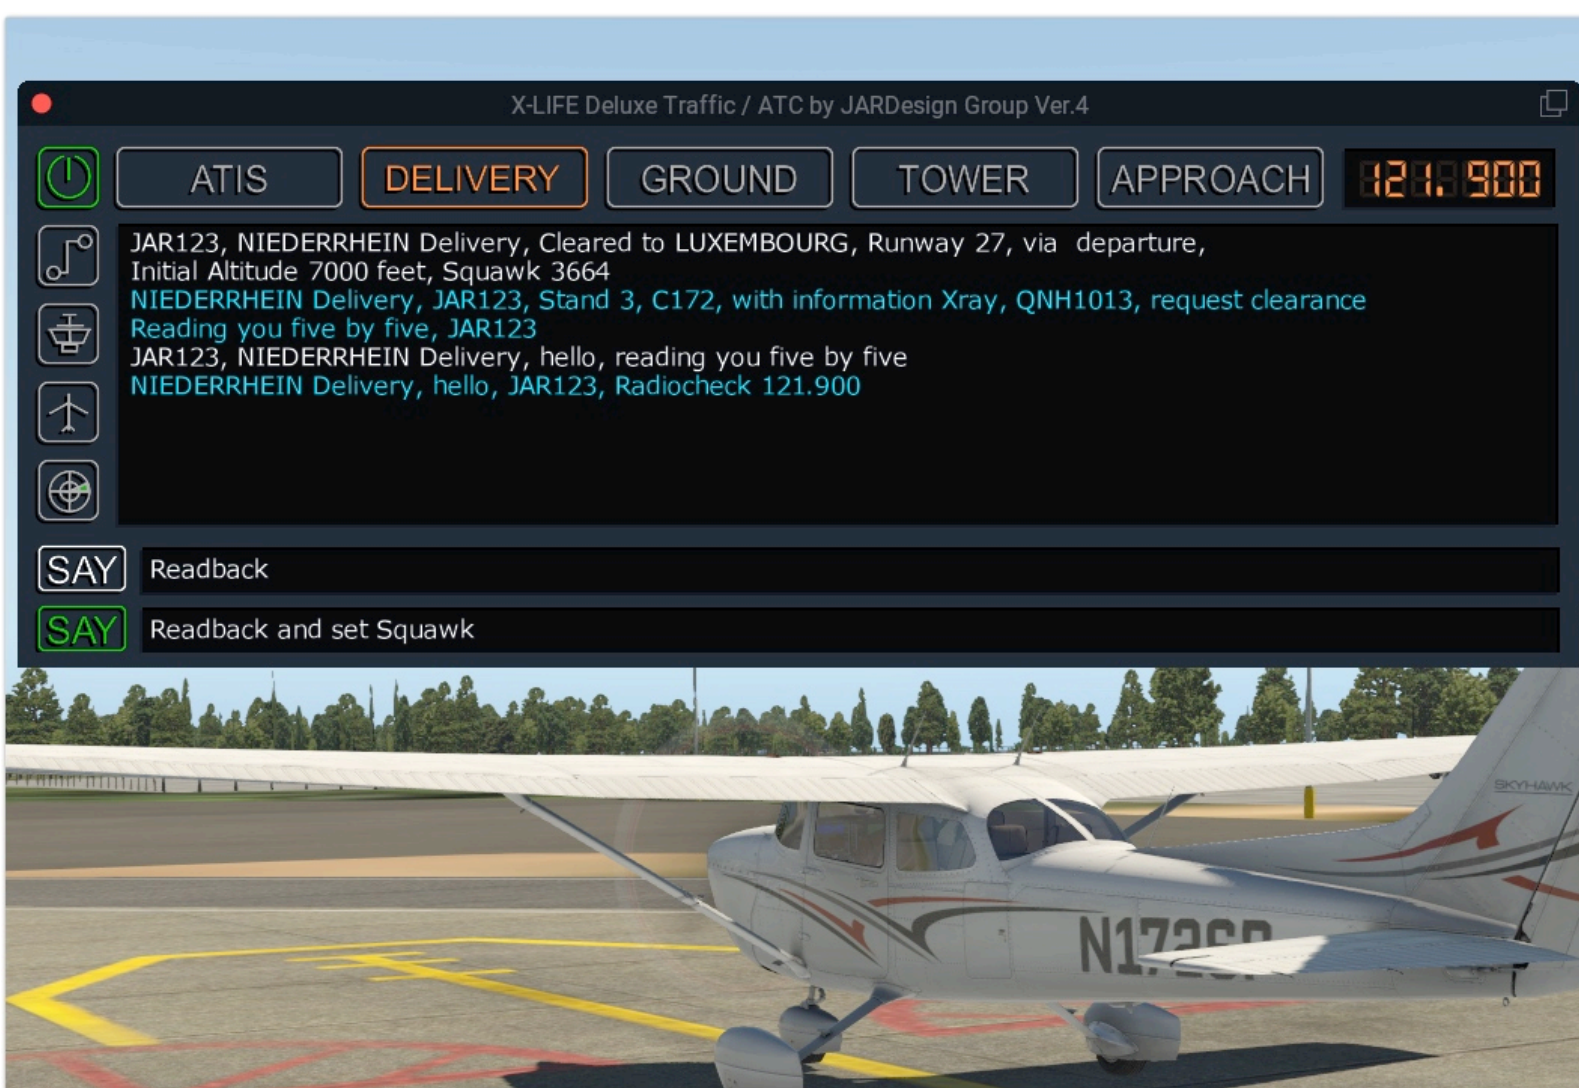

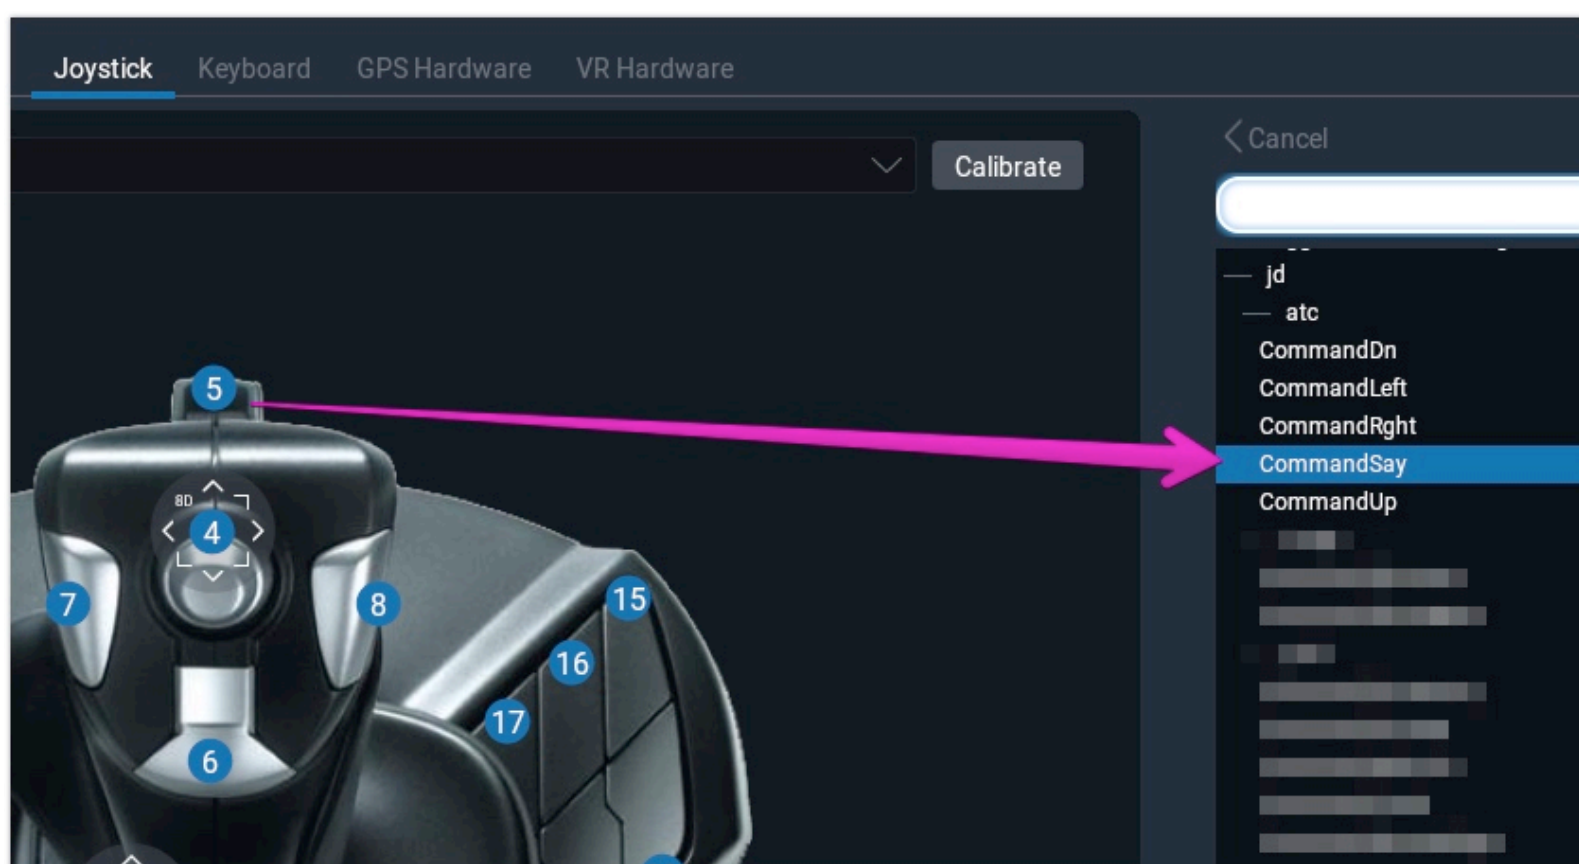

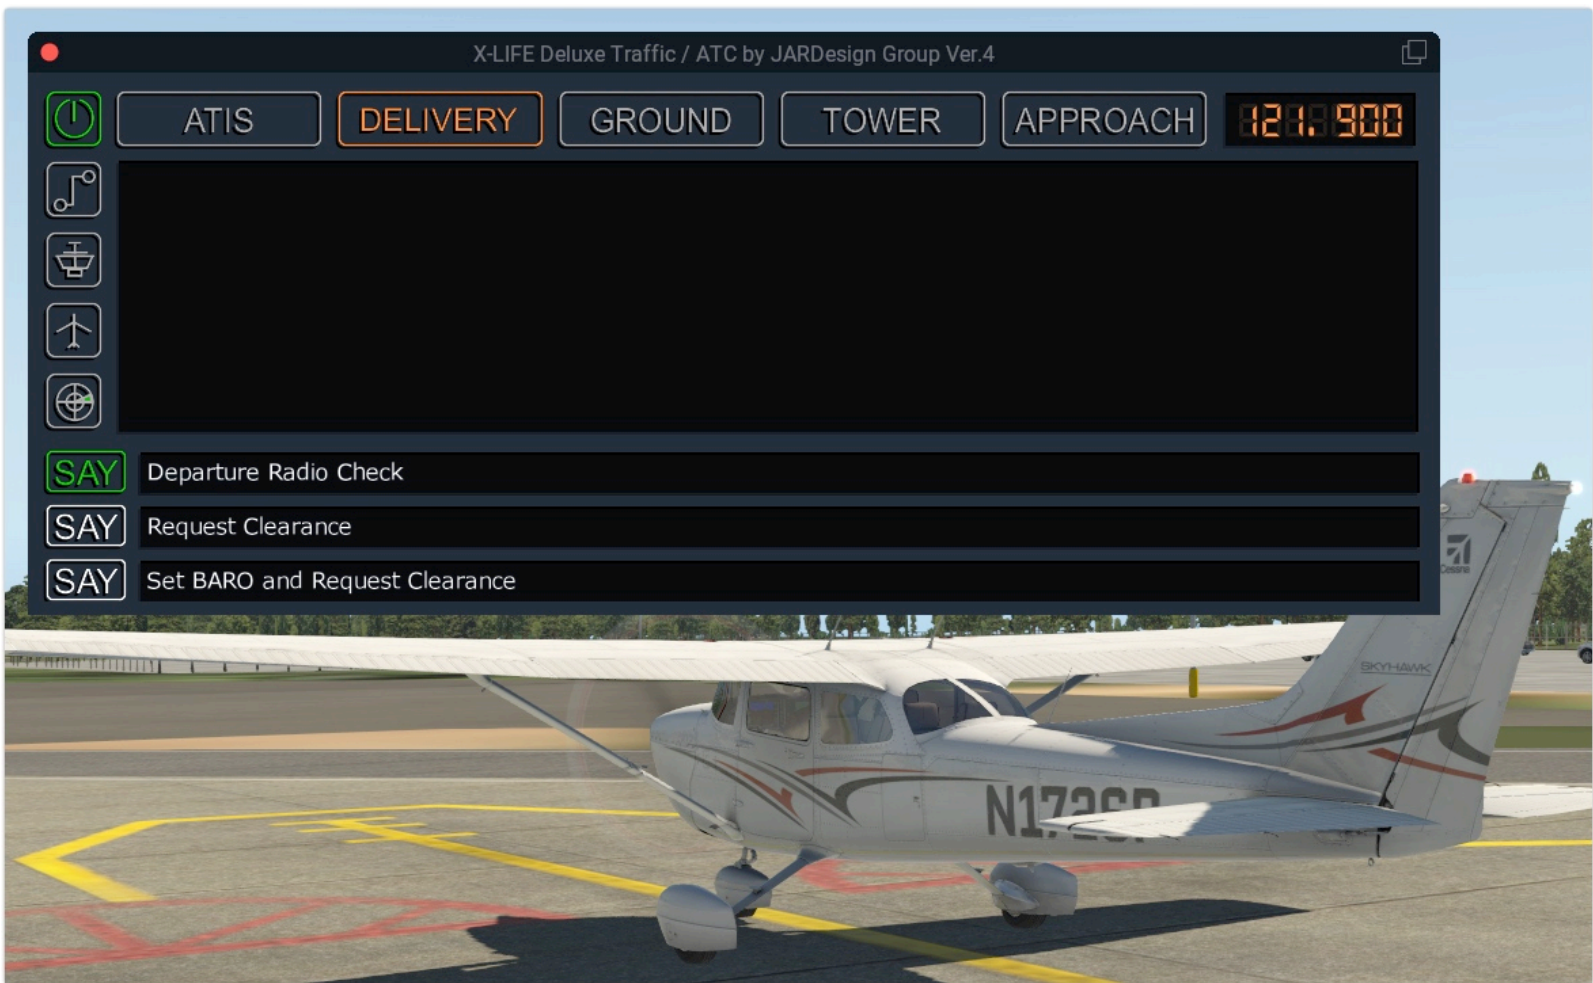

Another way to prepare flightplan - use service like http://rfinder.asalink.net/free/ and paste just prepared string with route text to file inside your X-Life/Flightplans folder with name EDLVELLX.txt in this case. Next you may just import this plan from file.

So, you and ATC have flightplan now. You may read ATIS info and start dialog with ATC. Select Delivery and request clearance. You may switch positions and phrases also using
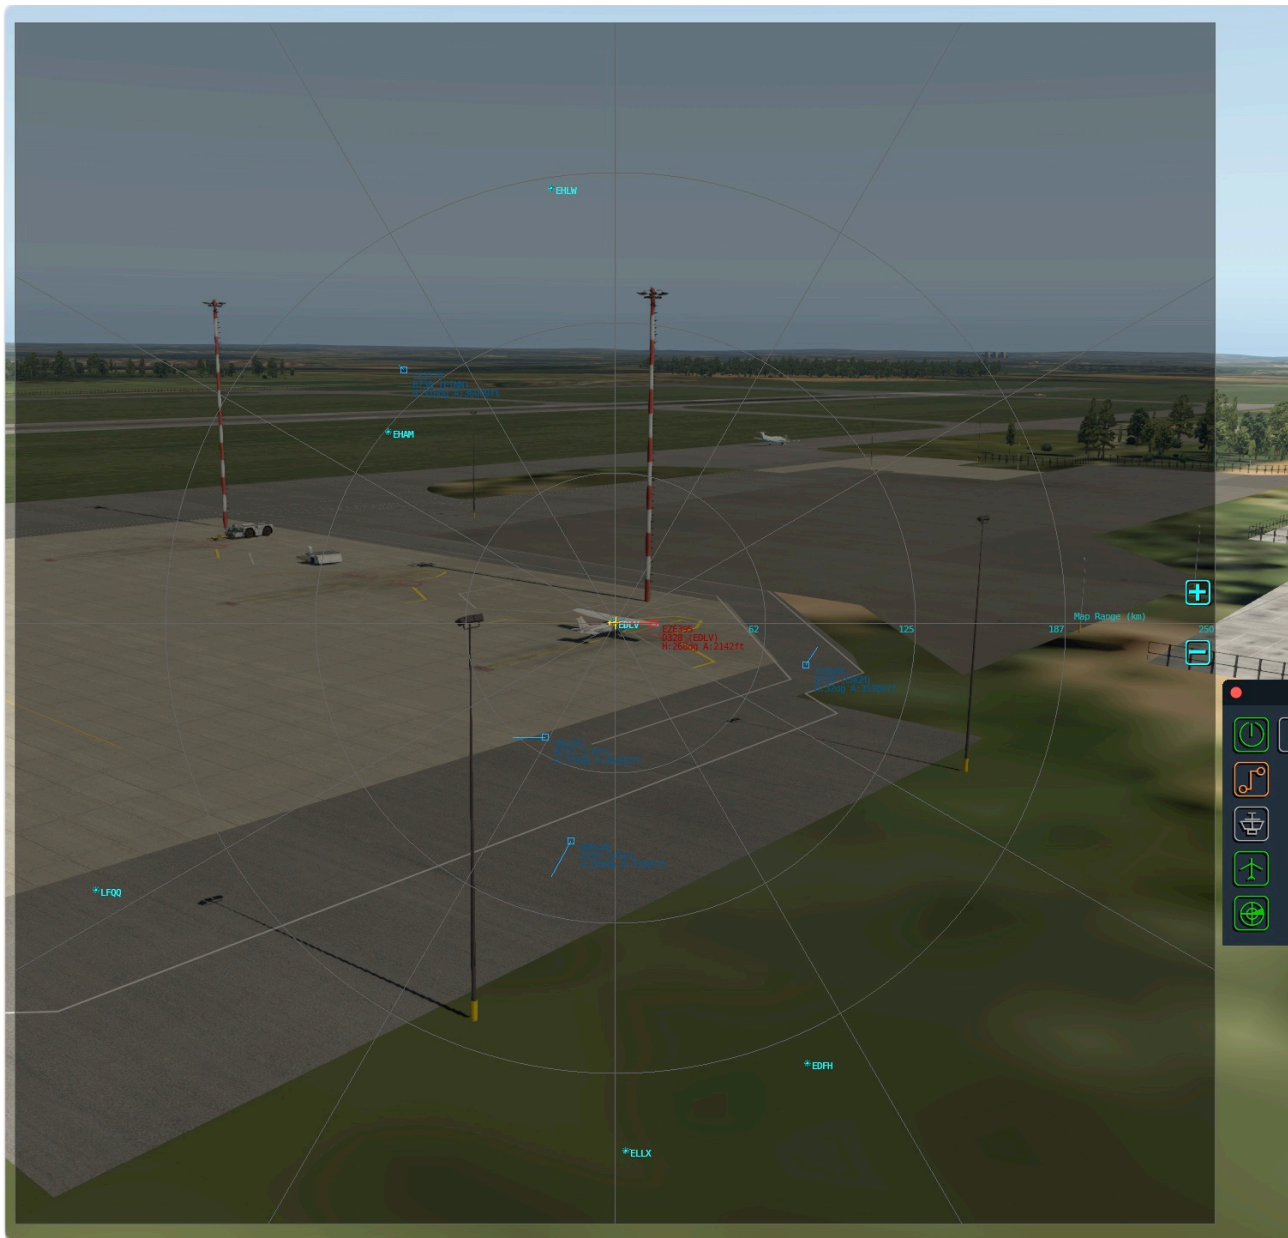

joystick buttons assigned like this:

Continue dialog with ATC during your flight.

Select this button to see aircraft(s) lables.

Select radar button (below aircraft lables button) to see radar MAP.

ATC panel have auto-hide function. If so - you may show it again - please move your mouse over SHOW ATC PANEL lable.

If JARDesign Follow Me Car plugin is installed, pilot may request it via dialog just after getting taxi route

UPDATE YOU NAV DATA WITH FRESH CYCLE (if needed)

X-Life use NavData cycle by Aerosoft from own /navdata/ subfolder or (preferable) from ../ X-PLANE/Custom Data/GNS430/navdata/ folder if exist If you need update your cycle, please use Aerosoft/Navigraph "JARDesign a320/330/X-LIFE Native format" and put new cycle to ../X-PLANE/Custom Data/GNS430/navdata/ folder create ../X-PLANE/Custom Data/GNS430/ folder before (if not exist)

REQUIREMENTS:

X-Plane 10.45+, i5-i7 CPU: 2,4Ghz Multi-core. Memory: 8 GB RAM. Video Card: 2Gb VRAM. 64 bit OS (Windows 7 / 8 / 10, Mac OS X 10.9-10.11). For good performance, you need 3Gb Video Card, at least like Nvidia GTX780Ti or ATI analog. At least you should have OpenSceneryX library installed. Also you should have stable internet connection.
